

## Apply any Moving Average on Chart

Apply EA on chart on Type Moving Average to Use as stop loss , also choose from options below Type of MA ( Simple , exponential , weighted etc.) and applied candle price ( open , close , Median etc.) from options.

**Please Note :-**

EA Uses closing price of candle in current time frame , therefore remember to use correct timeframe while applying EA ,

If EA is applied on 4hr chart ,but later time frame changed to 15 min, EA will close the trade if 15 min. Candle closes below applied moving average & not 4hr candle or viceversa.
